Yolxander Jaca.

FULL-STACK ENGINEER / TORONTO

yolxanderjaca@gmail.com

PORTFOLIO: yolxanderjaca.com

Good design. Solid engineering.

WHAT I DO

I build intuitive interfaces and reliable backend systems. With 8+ years across product work, I turn considered design into dependable APIs, databases, and shipped web experiences.

SELECTED EXPERIENCE

2021 - PRESENT

Humancontact

Full Stack Engineer

Built and launched Merjj, a scalable engagement platform. Led a small development team delivering high-traffic features including booking systems and live streaming experiences. Worked across PHP, Laravel, Inertia, Next.js, MySQL, and LLM workflows.

2020 - 2021

Esiance

Full Stack Developer

Integrated secure, scalable Stripe payment flows. Refactored legacy PHP modules into Laravel services and modernized Laravel 5 codebases to Laravel 8, improving maintainability and performance.

2019 - 2020

Agency5

Full Stack Developer

Built cross-browser internal tools and expanded a Laravel inventory system integrated with WordPress APIs. Delivered scalable backend workflows that reduced costs by 20%.

SELECTED WORK

01 AutoShow

The digital home of the Canadian International AutoShow.

02 Merjj

Events, content and connection for distributed teams.

03 EverythingCard

Commerce infrastructure for gifting and recognition.

BACKEND

Laravel / PHP / Node.js / REST APIs / PostgreSQL / MySQL

FRONTEND

React / Next.js / Vue / TypeScript / Tailwind / WordPress

PLATFORM

AWS / Docker / Vercel / CI/CD / Supabase

AI & TOOLING

OpenAI API / GitHub Copilot / Codex / Devin.ai / Hermes Agent / Figma
